

AUTO PO PRO 6.0

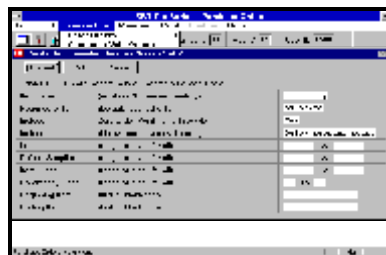

Auto PO Pro 6.0 converts inventory shortages into purchase orders automatically. Auto PO Pro is an ideal solution for SBT Pro Series purchasing managers who order many inventory items from many vendors.

Features of Auto PO Pro

- C Generates a *recommended reorder* list of needed items which can be added to, edited, deleted and manipulated like ordinary purchase orders before they are converted to purchase orders
- C Converts recommended reorders to purchase orders either *singly*, by *vendor*, *location*, or all at once
- C Full support for multiple locations and multiple suppliers
- C Ability to restrict list of recommended reorders and resulting purchase order by *item type*, *location*, *supplier*, *class*, *commodity code* and *item range*
- C Allows selection of either *default* vendor, *vendor last used*, or *least expensive* vendor
- New!** Switch feature lets you easily re-allocate line items or entire recommended reorders from one vendor to another
- New!** Recommended Reorders may be printed as a *Request For Bid*
- New!** Support for purchase order vendor alternate remit-to address
- C Detail and Summary reports on pending recommended reorders sorted by vendor, location and item
- C Marks newly generated purchase orders as either printed or unprinted
- C Interface and programming compatible with *SBT Pro Series 6.0i* standards
- C Modifiable when purchased with source code
- C Certified compatible with
- C Reliable. Now in its third Pro Series generation and running flawlessly for satisfied users around the world
- 100% compatible with *SO-2-PO Pro* from Lefkowitz Systems
- 100% compatible with *Seasonality for Auto PO Pro* from Lefkowitz Systems

Regular use of Auto PO Pro

- < Saves time by writing purchase orders automatically for items which have fallen below their order point
- < Keeps inventory stocked optimally
- < Reduces the frequency of costly data entry errors
- < Reduces the likelihood of catastrophic shortages
- < Reduces the frequency of missed sales, shipments and manufacturing runs
